CAREER OBJECTIVE

Motivated and detail-oriented BSIT graduate from Central Philippines State University seeking a Junior Web Developer or Full Stack Developer role. Skilled in PHP, Laravel, React, HTML, CSS, JavaScript, MySQL, and MongoDB. Passionate about building practical web applications and eager to grow professionally in a team environment.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, TypeScript

Backend: PHP, Laravel

Database: MySQL, MongoDB, PostgreSQL, SQL

Tools & Platforms: Git, GitHub, Figma, VS Code

Other Skills: REST API Development, CRUD Applications, AI-Assisted Development

ON-THE-JOB TRAINING (OJT)

IT / Web Development Intern

Central Philippines State University (CPSU) — Victorias City Campus | 2024 – 2025

- Assisted in developing and maintaining web-based applications using PHP and Laravel framework.
- Built and tested frontend interfaces using HTML, CSS, JavaScript, and React.js.
- Designed and managed database schemas using MySQL for web application projects.
- Collaborated with the IT team to plan, develop, and deploy internal web systems.
- Documented system features, user flows, and database structure for project records.

PROJECTS

SCOUTMASTER — Boyscout Management System [THESIS PROJECT]

- Developed as a thesis project — a full management system for Boy Scout organizations using PHP and MySQL.
- Features include member registration, troop management, activity tracking, and reporting modules.
- Designed the system architecture, database structure, and user interface from planning to deployment.

OFW-PORTAL-JOB — OFW Job Hunting Portal [THESIS PROJECT]

- Developed as a thesis project — a full-featured job portal web application for Overseas Filipino Workers using PHP.
- Includes job listing, job search, employer and applicant accounts, and application management features.
- Handled full project planning, UI/UX design, backend development, and database design using MySQL.

DOCUMENT TRACKING SYSTEM — TypeScript

- Created a document tracking web app for organizations using TypeScript.
- Supports both soft copy and hard copy document monitoring and status tracking.

SUPPLY OFFICE INVENTORY SYSTEM v2.0 — Laravel (Blade)

- Built an inventory management system for a supply office using Laravel and Blade templating.
- Features stock monitoring, item categorization, and transaction history.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Central Philippines State University (CPSU) — Victorias City, Negros Occidental

- Completed coursework in Web Development, Database Management, Systems Analysis & Design, and Software Engineering.
- Built multiple full-stack web application projects as part of academic requirements.
- Completed On-the-Job Training (OJT) at CPSU Victorias Campus IT Department.
